

Grow with Us: Exciting, Promising, and Rewarding Career Opportunities at Kemflo Canada Inc.

Established in 1988, Kemflo Canada Inc. has become known for its expertise in the world of high-quality injection molded products. The company significantly grown over the year, working with 24 molding machining, ranging from 40-1200 tonnage in the city of Richmond Hill, ON. With many long-term and dedicated employees who value the company's integrity and commitment to excellence and social responsibility, Kemflo seeks professionals in areas such as processing technicians to design engineers.

A few of the recently available positions are:

Licensed 431A Mould Maker: looking for an experienced and hands-on individuals who would be responsible for the repairs, improvement, and maintenance of plastic injection tools. The main functions would be to support production and maintain the tool equipment room. It is essential to fully understand the principles and construction of plastic injection tools.

Outside Sales/Business Development: seeking an ambitious and experienced salesperson to develop new sales through marketing and building a sales program. Most sales come from Canada and US, but opportunities are endless for someone who wants to be successful.

Processing Technicians: we are always looking for experienced setup and processing technicians. These technicians would be responsible for all aspects of the injection molding process from setup to processing material to the maintenance of the molds.

Electro-mechanical Technicians: seeking an experienced and hands-on individual who would be responsible for ensuring all molding machines, temperature regulators, controllers, robotics, feeding systems, and all auxiliary equipment are running and maintained in excellent working condition. Perform preventative maintenance on all key machinery and be responsible for overall plant maintenance and repairs wherever needed.
