

# KEEP CALM WE'VE GOT YOU COVERED

**The aquaculture industry is undergoing significant change, with businesses consolidating or exiting the sector. Aquatic Equipment & Design would like to reassure all readers that it is fully committed to the future of the aquaculture industry and looks forward to working with its existing customers and new clients. When you partner with Aquatic Equipment & Design, you can rely on us to be there for you and your colleagues over the long term.**

Having launched in 2014, Aquatic Equipment & Design is proud to support the aquaculture industry with a wide selection of equipment and design services to customers around the world. With over 30 years combined industry experience, owners, Amy Riedel Stone and Huy Tran, guarantee that they can accurately and affordably source any products for their clients' needs no matter their location. "I have always taken great pride in the designs which I provide my clients with" says Tran, VP & Owner of Aquatic Equipment & Design. "My hands-on experience in this industry has proven resourceful time and time again."

Both owners having originally worked together in Apopka at Aquatic Eco-Systems, Tran and Riedel-Stone dedicate much of their current success and core company values at Aquatic Equipment & Design to that of the original AES founder, Robert "Bob" Heideman, a former Navy SEAL. "His values and mission were to bring the most experienced customer service and affordable products to the aquaculture industry", says Riedel-Stone, President & Owner of Aquatic Equipment & Design. "Huy and I are proud to have been able to learn from Bob and continue his mission and values today."

As tides continue to change, and aquaculture suppliers come and go, one thing is a constant: Aquatic Equipment and Design remains dedicated to servicing the aquaculture Industry. Whether it's providing designs for new builds, consulting on a facility refurbishment or simply supplying equipment, whatever your need, the Aquatic Equipment & Design team are available to help fish growers with their operation and supply them with the latest equipment and technology the sector has to offer.
